Low-Moisture Cleaning

and the Warranty Conundrum Page 56 ▶

CONNECTIONS conference

APRIL 29, 30 & MAY 1, 2010

At the Hyatt Regency Orlando, FL

Details on Pages 14-15

Fluke Corp.

New Fluke catalog now available in print and online

Fluke Corp. has published its latest 2010 Fluke Test Tools Catalog. The full-color catalog is available online and in print.

The fully illustrated 64-page catalog opens with overview pages that connect the dots between common industrial and commercial equipment and the measurement tools needed to help maintain it. The catalog also features selection guides to help technicians differentiate by measurement or application area which of the various Fluke digital multimeters, power quality testers and analyzers, process tools and tool accessories will work best in their application. *Circle 234 on the Reader Inquiry Card.*

Carpet Brush & Clean

Carpet Brush & Clean takes competition to the cleaners

Carpet Brush & Clean announces company's recent expansion efforts abroad. "Our Hybrid PRO 35/Pro45 is first system which can do the job of cleaning both hard floor and carpet," Chris Matzenberger, CEO of Brush & Clean said.

"With today's concerns regarding one's health and environmental issues, Brush & Clean is dedicated to bringing our customers easier, environmentally safe conditions with dryer carpets in their offices, hospitals, hotels and homes," Matzenberger said. "The Tandem Pro 35/ Pro 45 also falls right in line with that standard. *Circle 235 on the Reader Inquiry Card.*

Bio-Pro Research

Bio-Pro Research puts pillows back in their place

For many, the easiest way to remove red wine or coffee stains is to cover them up with a strategically placed pillow. Bio-Pro Research's Wine Off & Coffee Off is "proven to completely remove these stain instead of just cover them up."

Wine Off & Coffee Off is a unique formula of bacteria and enzymes that actually eat away your stains. Bio-Pro Research "likes to think of their cleaning as a 'natural workforce of 1 Billion' (enzymes that is) working hard to leave furniture, table linens and carpeting stain-free," the company said. *Circle 233 on the Reader Inquiry Card.*

International Stoneworks

Int'l Stoneworks unveils "green" natural stone care line

International Stoneworks presents its new line of "green" products. Each product –Lavenet Green, Seal & Go W and Ver Glow #2 – is effective and safe for the user and the environment, according to Rawi Tabbah, International Stoneworks president.

"This is International Stoneworks' first 'green' venture, and we are so pleased to introduce products where their effectiveness is only matched by their eco-friendliness. We saw a demand, commercially and residentially, for efficient, safe, "green" products, and we delivered," Tabbah said. *Circle 227 on the Reader Inquiry Card.*

Enviro-Solutions

Enviro-Solutions launches ES360

PURE Bioscience announces the launch of **Enviro-Solutions'** ES360, a new disinfectant product based on PURE's patented silver dihydrogen citrate (SDC) antimicrobial technology.

The disinfectant is "ideal for use in such environments as business and office facilities, educational and healthcare settings, day care centers, and government agencies."

"Enviro-Solutions maintains a strong commitment to delivering proven, high-performance and environmentally sound products to the market," said Michael L. Krall, president and CEO of PURE Bioscience. "We look forward to our partnership with Enviro-Solutions and their distributors as we introduce ES360 to the professional cleaning industry." *Circle 225 on the Reader Inquiry Card.*
