2 are a graphite metal-bond to shape the stone, and positions 3 to 5 are a non-flexible resin diamond with Velcro to attach to a Velcro snail-lock head. A final buff position 6 is available if a higher shine is desired.

Rival blades are silent core diamond blades for stone gantry saws.

The red-colored blades are sandwich diamond segments in 20 mm height, and the yellow-colored blades have sequence applied diamond segments in 20 mm height. The diamonds are

placed evenly up and down and side to side to ensure consistent quality and speed of cut. The blue blades also have sequence applied diamonds, but offer a taller 26 mm segment for longer life.

*International Stoneworks*, a Houston-based company offering natural stone restoration and maintenance products, presents its **new line of "green" products**. The entire product line, which includes Lavenet Green, Seal & Go® "W" and Ver Glow #2, is effective and safe for the user and the environment, according to Rawi Tabbah, International Stoneworks President, adding that the entire line is Leader in Energy and Environmental Design (LEED) compliant.

Lavenet Green is a neutral cleaner for natural stone, ceramic tile and grout. The product is VOC compliant and biodegradable with no solvents

or phosphates, reports International Stoneworks.

Seal & Go® "W" is a water-based impregnator sealer that provides maximum protection against water and grease stains for all interior natural stone surfaces and grout, while preserving the stone's natural appearance. International Stoneworks reports that the product does not contain any solvents and is VOC compliant in all 50 states.

Ver Glow #2 is a non-acidic natural stone polishing compound, which adds a beautiful shine to stone surfaces.

"This is International Stoneworks' first green venture, and we are so pleased to introduce products where their effectiveness is only matched by their eco-friendliness," said Tabbah. "It is International Stoneworks' firm belief that people should use only the best specialty products for their stone investments. We saw a demand, commercially and residentially, for
